

# QUALITY POLICY

Attindas Hygiene Partners is committed to providing dignity, health and comfort to millions of parents, infants, seniors and caregivers across the world. With a focus on safety, effectiveness, quality and comfort, we constantly strive for excellence in delivering the right product, in the right way, at the right time and at the right price.

We achieve this through maintaining an effective Quality Management System, commitment to use of sustainable forestry materials and providing products that satisfy all legal, environmental and customer requirements of the market areas we serve. This starts at the highest level in our organization and is carried out through the cooperation and effort of every employee.

It's our ability to unite as an agile, caring and innovative team that makes us:

Designers of products that respect our environment and fulfill the high expectations of our customers and consumers.

Providers of consistent products; true to the design every time.

Change agents that are continually improving the quality of our products and services by constantly challenging "Status Quo".
